

SAMUEL J. TUSICK

724-601-4365 | samtusick@outlook.com | www.linkedin.com/in/samuel-tusick

EDUCATION

Florida Gulf Coast University

Fort Myers

Bachelor of Science in Software Engineering

Expected May 2027

- **In-Major GPA:** 4.0 | Dean's List (2023 and 2025)
- **Relevant Coursework:** Data Structures and Algorithms, Digital Systems and Architecture, Computer Security, Programming II, Discrete Mathematics, Intro to Cloud Computing, Software Engineering Fundamentals

PROJECTS

NHL Stat Scraper – *Python, Flask, Selenium, React, Vite*

- Designed and implemented a full-stack application to collect and display NHL player statistics.
- Built a Flask backend using Selenium to scrape live data from official league site and expose it through RESTful endpoints.
- Developed a React frontend with Vite to let users select categories (e.g., skater goals, assists) and dynamically view results.
- Added query parameters for flexible data retrieval and efficient filtering.

Personal Portfolio Website – *React, Vite, JavaScript, CSS*

- Rebuilt a personal portfolio site using React and Vite for a faster, more maintainable codebase.
- Implemented reusable React components and responsive layouts to showcase projects, research, and skills.
- Integrated animations and interactive elements to improve user engagement and navigation across devices.
- Designed the site with a fully responsive layout
- Hosted the site via GitHub Pages

RELEVANT EXPERIENCE

FGCU Dendritic AI & DS Institute

On-site

Student Research Assistant

March 2025- Present

- Work with a small team to research and develop Agentic AI solutions.
- Helped develop a Summer Academy and courses that allowed the local community, students, and staff to learn how AI can be used and have the ability to work with it hands-on.
- Work on custom agents for engineering Learning Hub mentors and students and other third party organizations.
- Work on a “Mental Health Ai Training Avatar” for Marieb College of Health and Human Science

Router-Level Security Detection

On-site

Subteam Lead & Backend Developer

February 2025 – April 2025

- Led a 5-member subteam in an ongoing Eagle CyberNest Lab research project, enhancing a home-network security platform.
- Coordinated with the faculty mentor to gather requirements and delegate tasks, ensuring consistent progress.
- Using Python, Flask, SQLite, and SSH, built and optimized backend services to integrate three router models, enabling secure real-time data collection and storage.
- Tested and deployed router-communication scripts, improving system reliability and security.

Princeton University

Remote

Research Assistant – Computational Usage in Different Fields of Study

February 2023 - June 2023

- Collaborated with a team to assist in interviewing and transcribing over 300 conversations with professors and other professionals across various fields of study, exploring how they integrated programming into their research and work.
- Collected and analyzed data on tools and methods used by researchers.
- Helped streamline the interview and data collection process by helping with organization and documentation.

Ambridge Area Senior High School

Ambridge, PA

Tech Intern – Tech Department

January 2023 - June 2023

- Collaborated with another intern to assist in the maintenance and troubleshooting of computer software and hardware for over 500 staff and students.
- Provided technical support during various school activities and events, ensuring all equipment was functioning properly.
- Gained hands-on experience in software installation, device network maintenance, and user support.

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Python, JavaScript
- **Tools and Technologies:** Visual Studio Code, CLion, Git, Selenium, React, Vite, Flask, Jupyter Book, Jira

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
