

# SAMUEL J. TUSICK

724-601-4365 | samtusick@outlook.com | www.linkedin.com/in/samuel-tusick

## EDUCATION

### Florida Gulf Coast University

Fort Myers

*Bachelor of Science in Software Engineering*

Expected May 2027

- **Honors:** Dean's List (2023, 2024, 2025), Ruth M. and Cleveland L. Campbell Engineering Scholarship Endowed Fund
- **Relevant Coursework:** Operating Systems, Software Testing, Intro to Data Engineering, Requirements Engineering & Analysis, Intro to Cloud Computing, Software Engineering Fundamentals, Computer Organization & Assembly Language Programming, Data Structures & Algorithms, Computer Security, Calculus III, Differential Equations.

## RELEVANT EXPERIENCE

### FGCU Dendritic AI & DS Institute

On-site

*Student Research Assistant*

March 2025- Present

- Supported the coordination and delivery of the 2026 FGCU Summer AI Academy, serving over 500 participants through trainings, workshops, webinars, and more than 150 hours of instructional content.
- Designed, developed, and maintaining over 14 custom AI tutors actively used within the WCE Learning Hub.
- Contribute as a developer to a master's thesis project focused on an AI Avatar Training System for mental health training scenarios.
- Research and evaluate emerging Agentic AI technologies for educational and operational applications.

## PROJECTS

### Switch4Good Database System – PostgreSQL, SQL, Data Engineering

- Led a team developing a database system supporting impact tracking for a nonprofit organization that handles over 100 universities and 1,500+ students.
- Designed a PostgreSQL schema to manage student participation, projects, institutional partnerships, and program outcomes.

### Pinterest Testing Suites – Java, Selenium

- Led a software testing team evaluating Pinterest.com through automated testing methodologies.
- Developed Selenium-based test suites in Java and presented findings related to functionality, reliability, and usability.

### NHL Stat Scraper – Python, Flask, Selenium, React, Vite, Render, Netlify

- Designed and implemented a full-stack application to collect and display NHL player statistics.
- Built a Flask backend using Selenium to scrape live data from official league site and expose it through RESTful endpoints.
- Developed a React frontend with Vite to let users select categories (e.g., skater goals, assists) and dynamically view results.
- Added query parameters for flexible data retrieval and efficient filtering.

## TECHNICAL SKILLS

- **Programming Languages:** C, C++, Python, SQL
- **Tools and Technologies:** Git, Selenium, PostgreSQL, Supabase, SQLite, Jira, pgAdmin, VS Code, CLion, GitHub Actions

## CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate

## EXTRACURRICULARS

**Computer Science & Software Engineering Club** | Member

August 2024 - Present
